Proceedings

Multilingual Learners in UPK: Defining Focus and Direction

Roundtable Discussion June 5, 2015, Fordham University

Zoila Morell, Editor
Mercy College

Opening Comments

In June of 2015, as New York City expanded UPK to reach nearly all available four-year-olds, the New York State Association for Bilingual Education (NYSABE) and the NYS/NYC Regional Bilingual Education Resource Network (NYS/NYC RBE-RN) of Fordham University collaborated to hold a Roundtable event bringing together educators, policymakers, researchers, and community leaders in response to two overarching questions:

1. What are the needs of young emergent bilinguals within the structure of Universal Pre-Kindergarten (UPK)?
2. What is our focus and direction in preparing to meet their needs?

Participants from a wide selection of practitioners, policymakers, and other key stakeholders from the NYC, Long Island, and Westchester County areas, were invited to take part in the Roundtable which was held on June 5, 2015 at Fordham University.

The proceedings are organized into four sections: (1) Opening Comments; (2) Roundtable Welcome and Greetings; (3) History and Collaborators; (4) Panel Presentations with Breakout Sessions summaries. Following greetings from Anita Vasquez Batisti, Director of Center of Educational Partnerships, and Nancy Villarreal de Adler, Executive Director of NYSABE, the then New York State Associate Commissioner for Bilingual Education and Foreign Languages, Angélica Infante-Green (now Deputy Commissioner for Instruction), began with a “State of the Field” address on planning for young emergent bilinguals.

A panel, moderated by Dr. Luis Reyes (now Regent Reyes) and comprised of practitioners and researchers, introduced key topics (history, trends, emerging research, and new directions) in each of the five core areas of preschool education:
- Programming and instruction
- Leadership and policy
- Community partners
- Higher education and teacher preparation
- Research

The breakout sessions focused on each of the five core areas presented. Discussion within each breakout session was guided by comments and questions that emerged from the panel presentations. Also below, I include a synthesis of the consensus reached by participants of the breakout sessions. These are key recommendations the participants suggest should be considered in the field of Bilingual UPK.

The collective insights and suggested actions resulting from the roundtable can inform planning on behalf of emergent bilinguals. Together, practitioners, researchers, and policymakers, can define a focus and direction that ensures meeting the needs of the growing number of emergent bilingual children in New York State.

Roundtable Welcome and Greetings

Multilingual Learners in UPK: Defining Focus and Direction

Roundtable Discussion
Friday, June 5, 2015

Welcome & Greetings

• Eva García, NYC RBE-RN Executive Director

• Dr. Anita Vazquez-Batisti, Associate Dean Graduate School of Education

• Nancy Villarreal de Adler, NYSABE Executive Director

Defining our Focus

Dr. Zoila Morell
Associate Professor, Mercy College

Figure 2: Roundtable Discussion Slides 3 and 4.
Defining our Focus
Dr. Zoila Morell, Mercy College

- **Purpose:** “to help organize the efforts to provide effective instruction and programming for the growing number of multilingual children entering preschool programs at this time of rapid expansion of UPK.”
- **Process:** Convening scholars, leaders, and practitioners in a roundtable to articulate recommendations to the field.

---

**Terms:** There are currently many terms to define the same population – multilingual learners, emergent bilinguals, dual language learners. We find the term “English Language Learner” inadequate and so we abandon that term.

**Starting Point:** We promote bilingual education, that’s where we begin. Conversations revolve around implementing bilingual education.

**Recommendations and Target Action**

Latino Coalition for Early Care & Education (LCECE), policy initiative of The Committee for Hispanic Children & Families (CHCF) held Public Forum at Baruch College, CUNY, 2008

Key Issue Areas in Early Care & Education: language access, opportunities for professionals in the field, school readiness, family engagement, a Quality Rating & Improvement System, & community involvement & outreach.

Figure 5: Roundtable discussion slides 9 and 10.
History & Collaborators

LCECE Forum Recommendations:

- unified & more efficient data & information collection system,
- hiring & developing diverse, linguistic & culturally competent workforce,
- QRIS incorporate cultural aspects that affect learning, language acquisition, & cognitive development,
- adequate resources & funding for such programs,
- effective outreach strategies focused on Latino & multilingual-learning families, &
- better coordination among state & city agencies & school districts & between school districts, family day care providers, & child care centers.

Panel Presentations and Summaries

CORE AREA I

Instruction and Programming Presentation.

Panelist: Elizabeth Ijalba, PhD, Queens College Instruction and Planning

Instruction & Programming

Dr. Elizabeth Ijalba, Queens College

1. Alternate Interim Placement classes promote English-only language instruction and the majority culture.
2. There is a lack of parent education programs specifically targeted to immigrant families and to building parental engagement.
3. There is a general failure to consider the achievement gap for multilingual learners in UPK programs: Effective teaching should be experiential and framed within Universal Design for Teaching, Funds of Knowledge, and Translanguaging.

Alternate Interim Placement Classes

Dr. Elizabeth Ijalba, Queens College

• There are unclear guidelines for UPK teachers on how to work with multilingual learners.
• Responsibility for the home language is placed on teaching assistants who are only required to have a high school education.
• Limiting the presence of parents and not including families’ funds of knowledge disempower parents and foster divisions between home and school.

Figure 8: Roundtable discussion slides 15 and 16.
Lack of Parent Education Programs for Immigrant Families

Dr. Elizabeth Ijalba, Queens College

- Parents are often ambivalent about using the home language when all therapies and instruction for their children are provided in English.
- Parents often have limited understanding of language and communication disorders and how to support their child’s development.
- Parents often have a limited understanding of their rights, their responsibilities, and U.S. institutions.

Closing the Gap: Universal Design for Learning, Funds of Knowledge, Translanguaging

Dr. Elizabeth Ijalba, Queens College

- Instruction should include multiple ways of representation, expression, and generalization. There is current underutilization of technology and lack of guidance for teachers and parents.
- There is a need to learn about families’ funds of knowledge and how to integrate this knowledge into the classroom curriculum.
- There is a need to integrate the home language(s) as a means of communication and learning for multilingual learners.

Figure 9: Roundtable discussion slides 17 and 18.
CORE AREA I

Instruction and Programming Breakout Session Summary.

NYC RBE-RN Breakout Session Facilitators: Abby Baruch and Aileen Colón

High priority action steps:

I. Linking parent engagement to learning

A. Outreach to parent homes to establish intimacy.

B. Build bridges to access the funds of knowledge and the parent expertise that exists.

C. Identify which parents have had a higher level of education in their country.

D. Provide incentives to parents that will get them into the school building or if they are from low literacy regions (no library in the town).

E. Provide conferences to dispel the myths and to affirm the advantages of being bilingual.

F. Establish partnerships with CBOs. For example: Literacy Inc. to create a culture of literacy.

G. Partner with CBOs. They know the parents, they do not know strategies.

H. Create materials based on their experiences in the home. For example: Cooking or Family Celebrations. You can create visuals and picture collection/integrating technology.

I. Conduct workshops on how to have conversations with “little people.” Using pictures to tell a story orally, building from their own experiences, valuing the culturally diverse backgrounds of how we do things.
II. Need for High Quality Staff.

A. Administration who is not bilingual will not know how to select high quality staff.

B. There are not enough bilingual Pre-K teachers. Many teachers in the program are monolingual. Also, not enough dually certified teachers. (ENL and Special Ed.)

C. In the suburbs, the Pre-K programs are run by non-profit organizations and the salaries for teachers are low because it is based on the funding. (Meanwhile, these programs are housed in buildings where teachers are on the NYSED pay scale. (salary dicotomy).

D. There is a concern that the role of the teacher assistant (TA) is to teach the bilingual piece.

E. Support the TA with professional development.

F. Provide incentives for TA to become early childhood teachers.

G. Needs to be another avenue to prove you have expertise in the home language.

H. Need to change: Prevailing mono-lingual philosophy.

I. Question: Are we trying to make all UPK bilingual?

III. Funding needs to be Adequate if this is a priority!
There is no uniformity in UPK programs across the State – Standards, curriculum, etc.
CORE AREA II

Leadership & Policy Panel Presentation.

Panelist: Jorge Saenz de Viteri, LCECE

Figure 10: Panel discussion slides 19 and 20.
Leadership & Policy

Jorge Saenz de Viteri, LCECE

A Systemic, Comprehensive Approach to High Quality Early Care and Education

Currently, too many governmental and regulatory entities have oversight of the various early care and education settings in NYS. Our ECE delivery system is fragmented and challenging to navigate for both parents and providers alike. Complex regulations, funding gaps, and eligibility requirements exacerbate this problem.

Ensuring High Quality Early Care and Education to Support New York’s Dual Language Learners and their Families
Latino Coalition for Early Care and Education, CHCF, Inc.
February 2014

Figure 11: Panel discussion slides 21 and 22.

Leadership & Policy

Jorge Saenz de Viteri, LCECE

➢ Salary parity across New York City’s entire publicly funded early care and education system.

➢ That funding is set aside for ongoing preparation and professional development of the professional prekindergarten workforce with coursework on dual language acquisition and effective teaching practices for DLL students.

➢ That New York City promotes specific strategies that encourage parent involvement and support Latino parents in creating engaging language and literacy experiences at home to reinforce children’s learning at preschool.

➢ That the New York City Department of Education’s web-based systems expand to encompass all schools and providers who administer Universal Pre-K services and incorporate child outcomes data being collected through the various online systems that pre-kindergarten programs are currently using.

➢ That New York City ensures that the web-based information is also available in print format in the parents’ home language.

➢ That New York City’s early education programs ensure that children have opportunities to demonstrate their abilities, skills, and knowledge in any language, including their home language, and utilize assessments in both English and the home language that help determine what the child has learned and is capable of doing as well as the child’s level of language development.

➢ That Mayor Bill de Blasio creates the Office for Early Care and Education.
CORE AREA II

Leadership & Policy Breakout Session Summary.

NYC RBE-RN Breakout Session Facilitator: Elsie Berardinelli

I. Participants shared their role and level of experience in Universal Pre-K. Some participants voiced concern about the challenges faced by those working in Community Based Organizations (CBOs). One of the major challenges is making funding available to run programs. Funding comes from various sources. Programs outside of city often must take bridge loans while this is not the case in city run programs. They get their funds up front. How can Contract for Excellence, 7 million dollars be used? What can be done with this pot of money? This money can be used to write proposals.

II. The availability of supports: for example, Common Core Foundation Learning Standards and the Early Childhood Guidelines etc. Question posed, “How do we make these come to life?” There is a need to have conversations with legislators, continue to push them to take the next step and come up with agreed upon principles and guidelines. It is important to approach Marco Crespo, Governor Cuomo and others, and keep the conversation going; pressing them to pay attention. They have to be pushed and the issue of poverty has to be addressed. The dialogue must be changed and the opportunity has not been there. Capitalize on the politics. Our culture does not validate bilingualism. Why are we not mandating a celebration of languages? How do we set policies?

III. Parents/families need to be provided with information about how very important it is that they use and maintain their native language. Students will make gains if parents are supported to understand that their home language is an asset. It was agreed that family engagement is absolutely necessary and that criteria needs to be developed to make clear what authentic family engagement should look like.

IV. Teacher training is important. In many instances children in Pre-K programs that are encouraged to speak their home language (asset model) are given a different message when they enter kindergarten in a public school. The message is not aligned to the current vision of bilingualism. We have to do a better job of aligning what happens after Pre-K so that bilingualism continues for students that are speaking more than one language. How are policies implemented so there is fairness (equitable, accessible)? Draw on resources in schools and take advantage of funding. Teacher preparation programs have to ensure that the agenda moves.
V. Going forward/Next steps:
   I. What is the collective vision that we can present to legislators?
   II. There is a real anti-immigrant movement. What can we do within, without the support of legislators? Leverage the power of parents; use them to advance the agenda.
   III. Approach elected officials and leaders of various organizations such as ASPIRA
   IV. We need to brand ourselves. What is the collective message (Pre-K to College; multilingual)?
   V. Develop a vision, with clear goals, objectives, and a timeline.
   VI. Invite and bring in other stakeholders from private corporations.
   VII. Set criteria- What is a high quality bilingual program? What are the elements of effective bilingual program?
   VIII. How do we make our message inclusive – one that values world languages as well as multilingual programs?
   IX. Let’s be proactive; capitalize on the momentum, move quickly.
CORE AREA III

Community partners presentation.

Panelist: Danielle Guindo, Committee for Hispanic Children and Families

---

**Community Partners**

Danielle Guindo, Committee for Hispanic Children and Families

- CBO Partnerships in Public Schools
- NYC Early Education Centers (NYC EECs)
- Improving outcomes across settings
- Promoting bilingual education in CB settings
- Challenges to Access, Diversity, and Quality
- Partners – untapped potential

---

**Public Schools – CBO Partnerships**

Danielle Guindo, Committee for Hispanic Children and Families

- Social – emotional supports for vulnerable students and families
- Seamless integration in school governance and overall school culture to foster welcoming and inclusive school environment
- Increased student and family engagement
- Cultural and linguistic competency to reduce typical barriers to access and enrollment, and increase diversity in Pre–K classrooms

---

*Figure 12: Panel discussion slides 23 and 24.*
Community Based Pre-K  (NYC EECs)

Danielle Guindo, Committee for Hispanic Children and Families

- Imbedded and integrated into communities
- Provide continuity for families receiving other services from CBO
- Prioritize admissions for currently enrolled 3-year olds, children who have siblings enrolled, or are otherwise receiving services from the CBO
- Knowledgeable of and integrated in communities, with access and ability to reach isolated, vulnerable, and diverse populations

Improving Learning Outcomes Across Settings

Danielle Guindo, Committee for Hispanic Children and Families

- Incentives for professional development to increase number of teachers certified to teach in dual language classrooms
- Promotion of ideal that the use and development of home language is an asset
- Incentives to recruit diverse workforce
- Common Core alignment
- Data collection across settings to identify language status, ethnicity, gender, etc.

*Figure 13: Panel discussion slides 25 and 26.*
Promoting Bilingual Education in CBO Settings
Danielle Guindo, Committee for Hispanic Children and Families

- CBOs have added benefit of close connection with community
- Most effective CBOs are also networked with other nearby resources that can help spread the word (libraries, district offices of elected officials, CBO partners, hospitals)
- Parent education curricula that reaches parents where they are, in their own language, to empower them as advocates for their child; town halls or info events to educate parents about their rights, what they should expect from public school settings, and the elements of the common core state standards

Challenges to Access, Diversity and Quality
Danielle Guindo, Committee for Hispanic Children and Families

- Salary disparities between settings
- Elevating quality of staff in dual language programs must be done in a way that preserves the positions of existing teachers and encourages and motivates professional development and career “ladders”
- Insufficient demographic data on public schools and NYC EECs that can be used to examine diversity and access within classrooms and in various neighborhoods
- So far, only 10 “dual language Pre-K program” in Chinese or Spanish – other rapidly increasing populations must also be represented (ie Bengali). NOTE – this designation came from applying K-12 standards to the Pre-K
- DOE is unclear about the meaning of “enhanced language programs”

Figure 14: Panel Discussion slides 27 and 28.
Challenges cont’d
Danielle Guindo, Committee for Hispanic Children and Families

- Prioritization of enrollment for existing clients in NYCEECs can reduce socioeconomic diversity in these settings (both low income and higher income groups)
- NYCEECs that receive funding from ACS or HeadStart can extend hours of Pre-K through blended funding streams, also available only to income eligible families
- To maximize ability of CBOs to effectively serve school communities, common indicators must be known about the school population that can inform practice, hiring, and coordination of resources

Untapped Partners
Danielle Guindo, Committee for Hispanic Children and Families

- Child Care Resource and Referral (CCRRs) are experts in provision of professional development for early childhood educators, and can train Pre-K teachers in effective integration of emergent bilinguals; also directly communicate with parents to provide referrals and information and demystify the process of enrollment as well as support through:
- Health Care providers (neighborhood doctors and community based clinics can be hubs of info)
- Consulates
- Funders and Foundations to build on the momentum of interest in early education
- Grass roots organizations can recruit teachers as well as families
- Research institutions to facilitate data collection and analysis, and recommendations for policy and practice in UPK

Figure 15: Panel Discussion slides 29 and 30.
CORE AREA III

Community Partners Breakout Session Summary.

NYC RBE-RN Breakout Session Facilitator: Sara Martínez

How do we improve learning outcomes across diverse settings?
- Not taking play out of learning. Play based learning.
- Respecting the parents’ way of showing love to their children. Play resonates for parents.
- Empowering parents by re affirming giving children care, attention, and love.
- Using bilingual assessments that are culturally sensitive and respects the parents’ culture.

What is the current course of studies for cultural competency training?
- Mandating that all staff members must have cultural competency training.
- Empowering parents by making them real partners in education and not only using them for cake sales.
- Parent/Caretaker and child - Dual generation training.
- UPK mandate - Allocating sufficient funding to train staff and validate the mandates.
- Creation of Excellent Dual Language UPK.
- Who are the likely partners that we have overlooked?
- Mobilize groups of foundations, the Gates, Astor, and the Ford foundations, that advocate for children, education, and teacher training.
- Federal, State, local government, and unions.

What recommendations can we make to the field with regards to community partnerships?
Investment in a standard of cultural understanding, respect, and cultural humility into all early education practices and policies including:
- Cultural competency training for educators, and all school staff from custodian to principal.
- Empower parents’ role in the school community.
- Use linguistically appropriate assessments and cultural competency to communicate with parents.
- Implement play based learning.
CORE AREA IV

Higher Education & Teacher Preparation Presentation

Panelist: Juan Morales Flores, Kingsborough Community College

How do we elevate the status of early childhood educators and professionals?

Main Focus:
Educate all sectors of our society about the importance of providing high-quality, developmentally appropriate early childhood education programs.

At the same time, continue to:
Teach pre-service teachers and teachers about self-evaluation: being able to identify their strengths, areas in which they can improve, and their unconscious biases. Curriculum needs to reflect the diversity in our communities, cities, country, and the world.

Work hand in hand with families at all levels of education: curriculum, policy, funding, and allow them to be part of the decision making process.

Serve as mentors. Identify, motivate, and encourage students. Generate change one student at a time.

Put emphasis on the impact that civic engagement activities and volunteerism can have in our schools, families, and communities.

Big Goals:
True collaboration between government, private sector, and families.

Develop an equitable system of funding schools and education. Funding dependent mainly on property taxes needs to change in order to provide all children with an equal opportunity to succeed.

Develop programs to empower teachers and communities.
Example: The Respect Initiative to Transform Teaching and Leading

Result: An equitable early childhood educational system, equitably funded, in which families, government, and the private sector collaborate for the well being of the children. Allowing for the development of programs that would best fit the families and communities in which they are located. They need to be quality programs that teach all students about multiculturalism and respect and fosters multilingualism.

Figure 16. Panel discussion slides 31 and 32.
Higher Education & Teacher Preparation

Dr. Juan Morales Flores, Kingsborough Community College

What can teacher preparation programs do to promote bilingual education for multilingual learners across diverse settings?

Help develop consciousness regarding the characteristics and needs of the children in the different sectors (families, neighborhoods, towns, cities) of our country.

Develop and conduct learning experiences in all subject matters in which the pre-service teachers participate in activities dealing with multiculturalism and multilingual learners.

Help them understand themselves in order to become effective educators.

Share Demographics: As an example, Census 2010 indicated Majority of children, age 5 or under, belong to a racial and/or ethnic minority group. The number of immigrants has increased, especially Hispanics.

Advocacy through campus and community events, educational, and human rights organizations.

Figure 17. Panel discussion slides 33 and 34.

Higher Education & Teacher Preparation

Dr. Juan Morales Flores, Kingsborough Community College

Final Argument:

Not to foster bilingual education and to ignore multilingual learners, in my opinion, is an attack to the human rights of the children. United Nations Convention on the Rights of the Child (UNCRC), Article 30: The Right of Children of minorities/indigenous groups to learn about and practice their own culture, language, and religion. The right to practice one’s own culture, language, and religion applies to everyone, even in instances where the practices are not shared by the majority of people in the country.
CORE AREA IV

Higher Education & Teacher Preparation Breakout Session Summary

NYC RBE-RN Breakout Session Facilitator: Dr. Roser Salavert

The Institutions of Higher Education design their Teacher preparation programs based on the requirements of the state. Therefore, there is a need to ensure that these requirements respond to the expectations for high quality programs for pre-K children in a diverse and multilingual society.

By the end of the conversation, we agreed to propose action on three major fronts:

I. Ensure that the NYSED teacher certification for pre-K, bilingual and by extension all bilingual teachers, include not only methodology but,
   A. A component that prepares future teachers to work and collaborate with diverse and multilingual families and communities;
   B. the NYSED must require that any teacher candidate demonstrates proficiency in English and in the native language they plan to teach;
   C. demonstrated application of current research in classroom settings, and
   D. teachers should graduate with a vision for what students in bilingual programs will learn and an understanding of social and pedagogical goals and approaches regardless of whether students are in pre-K or high school.

II. All IHE and teachers should know about the New York State’s vision for English Language Learners and Bilingualism (i.e., opportunity for a Seal of Bi-literacy to motivate children and their families from a young age to grow bilingually). The NYSED in collaboration with IHE should develop a 5-year plan to make the vision of bilingualism a reality and thus ensuring that schools and districts not only have the necessary teachers to implement bilingual programs, but ensuring that the funding to colleges is aligned to these actions.

III. There have to be incentives to promote the acquisition of a second language among children from English speaking homes. NYSED promotes Bilingual Education Programs but they are typically available in higher incidence language i.e. Spanish, Mandarin, French. Incentives to teach a foreign language from pre-K to high school will also benefit colleges since they often find it difficult to prepare bilingual teachers in these lower incidence languages.
To help clarify:

Information about certification found via Teach Online Services
http://www.highered.nysed.gov/tcert/teach/login.html

- Early Childhood Education is Birth-Grade 2
- Childhood Education is Grades 1-6
- Middle Childhood Education is Grades 5-9
- Adolescent is Grades 7-12

Also found via Teach Online, for Bilingual Extension, the candidates have to take a Bilingual Education Assessment in the target language which “assesses knowledge and skills in the foundations of bilingual education, listening and reading comprehension, and written and oral expression. Offered in the target language of the certificate extension sought, it consists of multiple-choice questions, audiotaped listening and speaking components in English and the target language, and reading and writing components in the target language.”

Below is a link to the March 2015 Regents discussion item regarding additional pathways for the supplementary bilingual education extension and the ESOL supplementary certificate.

CORE AREA V
Research Panel Presentation

Panelist: Zoila Morell, Ph.D. Mercy College

Research

Dr. Zoila Morell, Mercy College

- Settling the Bilingual/English-only question – what are the advantages?
- What does the research suggest about bilingual instruction at the Pre-K level?
- Specific areas of need for multilingual learners:
  - Incidence of poverty
  - Immigrant populations
  - Oral language development
  - First assessments
  - Inconsistent programming
  - Access to preschool

Research

Dr. Zoila Morell, Mercy College

- Specific areas of strength for multilingual learners:
  - Emergent literacy
  - Prognosis on achievement
- Understanding school readiness – the movement & the expectations
Figure 18. Panel discussion slides 35 and 36.

Research

Dr. Zoila Morell, Mercy College

- Implications for Practice
  - Identification of multilingual learners
  - Instructional approaches
- Emphasis for research

Figure 19. Panel discussion slide 37.

CORE AREA V

Research Breakout Session Summary

NYC RBE-RN Breakout Session Facilitator: Diane Howitt

- The importance of research as a foundational tool for good practice
- Commit resources to the promotion of understanding of research
- Create Professional Learning Communities in all schools to study research at a deep level and turnkey through the school community
- Open access to resources
  - Resources are often blocked
  - How do we open this up to the broader educational community?
  - Pathways to access
- Revamp education programs and courses at the university level to include courses
  - Multilingualism
  - Cultural and linguistic issues
  - Language learning
  - Developmental issues, etc.
• Promote deep understanding of available research with the goal of understanding threads that make up entire tapestry
• Hone in on topics for further research that will be available to all educators
  - Misidentification of students
  - Over-representation of “English Language Learners” in special education
  - Child development birth through age 5
  - Parent choice
    - Bilingual versus ESL only programs
    - L2 (English) over L1 (home language)
  - Stereotyping
  - Research on the home-student connection:
    - Home visits
    - Local school programs supporting parent-child interaction/parents as teachers
• The importance of media in the dissemination of research findings
  - Encourages parents to push for change
  - Educates policy makers on issues pertaining to multilingual learners

![Conclusion & Next Steps](image)
